Hi Paul,

I have to let you know I have not been able to get a response from my partner's in the mine issue. I am going to try and get another person to step in and help out, if I can't then I will put up a bond and get the basic grading done by August 5th.

I just want you to know that I have not forgotten. Thank you and I will be in touch.

Kay Jean

Thank you for responding back. My letter (when you receive it) will sound a little terse. The Division of Oil, Gas and Mining must maintain a reclamation bond on the site, and with the cancellation letter from Village Bank there are a few things that need to happen.

My letter gives two options:

1. Do the basic grading work by August 5 (I believe that's the date; I don't have it in front of me) and put up a bond of \$5000 to cover revegetation.

2. Put up a replacement bond for the one that is cancelling and complete reclamation in the fall. I don't know what the premium is to maintain the letter of credit with Village Bank, but this may be the best alternative because you can do all the reclamation at once without having to re-mobilize equipment.

The best way to do the reclamation is normally to regrade then seed as soon after as possible. The inspector for Washington county, Lynn Kunzler, is a biologist and would be glad to work with you on the reclamation sequence and to develop a seed mix.

I'm out of the office today and tomorrow, but Lynn should be there both days. His phone number is 801-538-5310. Please feel free to call him.

I am sorry, Paul here is the new address: P.O. Box 898 St. George, UT 84771. Thank you for heads up, I have been wondering what I would have to do for that mine. I will start to work on it to figure out how I will be able to accomplish that. I have 1 question, is there a certain seeding I will need to put out or is it just the natural grasses already there. I am sure as I go along I will have more questions.

Thanks again for the heads up.
